

On the Subject of the Mouse In The Maze

Inside some bombs is a mouse that is remote-controlled via a chip in its spinal cord.

1. The mouse is located inside one of the following mazes.
2. The mouse can move forward or backward or turn left or right.
3. Pressing the circular button with the labyrinth either
 1. disarms the module if the mouse is located at the goal position, or
 2. causes a strike, if the mouse is at the wrong position.
4. The accepting position is marked with one of four colored spheres. Which one depends on the color of the torus in the middle of the maze, according to the table below.

Maze	Torus color	Sphere color	Maze	Torus color	Sphere color
	blue	white		blue	white
	green	blue		green	green
	white	green		white	yellow
	yellow	yellow		yellow	blue
Maze	Torus color	Sphere color	Maze	Torus color	Sphere color
	blue	yellow		blue	green
	green	blue		green	white
	white	green		white	blue
	yellow	white		yellow	yellow
Maze	Torus color	Sphere color	Maze	Torus color	Sphere color
	blue	green		blue	green
	green	white		green	yellow
	white	yellow		white	blue
	yellow	blue		yellow	white
